Depth of Experience

Completed more than 1000
assignments and trained over
500 professionals.

Broad experience with:

- ◆ Energy, natural resources, chemicals, pharmaceutical sectors;
- ◆ Governmental agencies such as USEPA, USPS, USAID, MSHA, and Bureau of Land Management; and
- ◆ Industry Associations.

25 years of assisting organizations improve Environmental and Social Governance (ESG) through innovative pragmatism reflecting best practices.

Services

Obbagy Consulting provides services to organizations seeking to advance environmental and social governance practices. We do so by:

- ◆ Identifying opportunities for strengthening internal environmental management practices.
- ◆ Designing environmental programs to build trust and consensus with communities, regulators, and selected stakeholders.
- ◆ Managing environmental programs during periods of organizational transition to help ensure consistency and focus in environmental governance activities.

Resources & Capabilities - Service Delivery

Obbagy Consulting is positioned to provide cost effective environmental strategy services based on the basis of the following:

- ◆ Excel at completing short term assignments and generating actionable recommendations. We have an established tool kit and a library of best practices reflecting extensive project experience at shop floor through the Board Room.
- ◆ Highly efficient at helping to advance performance through Innovative Pragmatism. Innovative Pragmatism is a lens applied to assessments, capacity building, and other environmental and social management functions, focused on gathering insights and transferring knowledge by leveraging and nuancing best industry practices to improve environmental governance outcomes in a step by step manner.
- ◆ Experienced and credentialed Women-Owned Business with commercial and governmental experience including USAID, USPS, MSHA, DoD, USEPA, and Bureau of Land Management.

Representative Project Assignments

- ◆ Functioning as the Executive Director of organizations providing leadership and financial management services. (2016-2017)

Client Support

Clients will attest to Obbagy Consulting's reputation for being client focused and the firm's commitment to providing assistance resulting in the achievement of long-term benefits and goals.

Two Dimensions of Quantifying ESG Value

Dimension #1: Quantifying the incremental actions taken to:

- Reduce impacts on natural resources;
- Create jobs such that employees are treated fairly across the globe; and
- Target sponsorships and grants towards activities that lead to positive social, educational, and environmental outcomes.

Dimension #2: Understanding and evaluating the financial implications of sustainability initiatives relative to the efficient use of natural resources, employee wellness, and social equity.

- ◆ Working with businesses and governmental representatives to enhance sustainable community networks. (2016)
- ◆ Gathered survey data on leading ES practices to establish benchmark for client program modifications. (2016)
- ◆ Used cost effective processes to review, conduct, and report on the environmental performance of more than 300 operations worldwide. (1985-2015)
- ◆ Sponsored study tour in the US to transfer environmental regulatory information to international professionals under a USAID contract. (2012)
- ◆ Developed environmental sensitivity analysis framework to provide a national government with a means to anticipate reactions to fossil fuel development activities. (2011)
- ◆ Examined the feasibility of developing a water and energy efficiency program for commercial, industrial, and institutional customers under a Bureau of Reclamation contract. (2008-2009)
- ◆ Directed a team in completing a process evaluation of California's 2006-2008 Energy Efficiency Statewide Marketing and Outreach (SWM&O) program. (2009)
- ◆ Outlined a strategy for analyzing greenhouse gas policies and their impact on industrial activities as input to the company's overall business strategy. (2008)
- ◆ Chaired a two-day Corporate Social Responsibility conference for energy and utility sectors and transferred information on sustainability metrics. (2003)
- ◆ On behalf of the Mine Safety and Health Administration (MSHA), directed a review of the agency's nationwide safety and health inspection program. (2002)
- ◆ Developed environmental leadership training program for oil executives to advance the firm's global reputation. (2001)
- ◆ Assessed the ability of the mining sector's industry association to provide sustainability assistance to members. (2001)
- ◆ Applied rating schemes to audit results to assist senior managers understand the status of ES governance performance. (1986-2011)
- ◆ Designed and facilitated a series of conferences for senior-level executives representing various mining and exploration operations around the world to introduce them to a policy for outreach with local communities. (1997)
